THE COMPANY

Ninki-UP is a brand from company "Ninki Concept Limited" based in Hong Kong.

The founder Nicolas Konefal and co-founder Yann Godard are two French web specialists with background in programming and graphics. Design passionate, and hungry for new technologies, they joined their ideas and talents to create original products in a growing market.

INTRODUCTION

The first Ninki-UP stand model for tablets and iPad has been released to the market in January 2012 in order to test the market and gather end-consumers' reviews.

The feedbacks have been more than positive, showing a real interest for our design and ergonomic stands.

Further to those motivating results, we created a new collection of 5 designs with distinct styles, fine-tuned details such as the new removable flexible arms and conceived a totally new packaging.

Ninki-UP was born, positioning itself as a tablet and iPad stand creator.

THE CONCEPT

DESIGN

The design is the key of our concept, we want to propose products with an unique, personal and decorative style.

VERSATILITY

Compatibility with all touchscreen tablets and iPad, with or without their protection case or "smart cover"

SIMPLICITY

Being able to use the stand instantly, without any particular manipulation, just by putting the tablet on top.

ERGONOMIC

Thanks to its flexible arms, it is a stand that can be used anywhere, on a cluttered table, on your lap, on a bed, a couch...always adjusting the view angle to your best reading comfort.

In order to have a unique stand with an outstanding design and great comfort of use

This model is at the origin of the "Ninki-UP" concept. Its design is sober, discreet and blends in all environments. This reworked version 2.0 brings finesse and details to the two little sculpted tablet rests, which conveys a visual lightness to this new model.

This "STANDING-UP" model is made from a slab of transparent acrylic, sculpted and polished. The two rests are made from a mould. Acrylic brings a light yet sturdy touch to the stand, with a rendering close to glass or crystal. The use of a slab allows this

great rendering quality, without any moulding or injection imprint.

The articulated arms are fixed by two magnets which makes them easily removable for an easier transportation, but it also offers you many possibilities to change the colors of the arms.

The tablet stand is presented with a beautifully-designed protective case which allows an iPad mini or other accessories to fit in. The leather texture with a sleek and clean finish conveys the high quality that we insist upon our products.

This very visual model brings a touch of originality and Art to your decoration.

The word "LOVE" won't let anyone indifferent.

The model "LOVING-UP" is made from a mass-colored red acrylic slab, it is laser cut then polished to obtain that shiny aspect.

Acrylic brings a light yet sturdy touch to the stand, with a rendering close to glass or crystal.

The use of a slab allows this great rendering quality,

without any moulding or injection imprint.

The articulated arms are fixed by two magnets which makes them easily removable for an easier transportation, but it also offers you many possibilities to change the colors of the arms.

The tablet stand is presented with a beautifully-designed protective case which allows an iPad mini or other accessories to fit in. The leather texture with a sleek and clean finish conveys the high quality that we insist upon our products.

A faceted model, cut like a diamond, giving the aspect of a decorative crystal sculpture.

The "BRIGHT-UP" is made from a mass-colored black acrylic slab or a transparent acrylic slab, lased cut, manufactured and polished in order to obtain a mirror aspect.

Acrylic brings a light yet sturdy touch to the stand, with a rendering close to glass or crystal.

The use of a slab allows this great rendering quality,

without any moulding or injection imprint.

The articulated arms are fixed by two magnets which makes them easily removable for an easier transportation, but it also offers you many possibilities to change the colors of the arms.
